

# Harbour Field and Play Area Refurbishment

The play area is in a very poor state at the moment. The climbing frame has been fenced off because the rubber matting has disintegrated and is a health and safety risk. We have also had to remove one of the goal posts because they were rotten.

Having a large housing development at the bottom of South Lane does have a consolation. The Parish Council have been awarded Section 106 monies. This is money a developer has to pay the local authority for infrastructure. A percentage of this is awarded to the Parish Council. We have been given a sum of £69,000; which we will put towards renewing the Harbour Fields and play area. The site for the existing play area will not be moved as the gates and fencing is too expensive to replace and are currently in good condition.

The Parish Council would like to ask you what you would like to see at the Harbour – it can be anything from new play equipment, improvements to existing equipment, enhancement of the wet meadow, improved landscaping or planting, etc. Sadly, the money received will not go as far as we would like so, please, realistic suggestions only. When we have received all the suggestions, we hope to have a consultation at the Harbour fields with residents and together create a solid plan. Please send your ideas back to the Clerk at the Village Hall or, alternatively, hand them in to the Post Office by the end of October.
